Dear HeatSavr

To who ever it my concern,

It does not come easy for me to recommend products to any one but Heatsavr after using it for three months has made such a dramatic change to our pool environment, Humidity has dropped significantly making it a more pleasing experience to use the pool and saving on the deterioration of the fabric of the building.

Energy savings were also very good so that it paid for it self several times over, chemical dosing has also been reduced, and chlorine smell also is insignificant within the pool area.

Energy savings after paying for HeatSavr over a two-month period were £468.47, and we are only just coming into the heating season.

Maintenance Manager,

William Cooper.
